A NYSDOS funded and joint NP&V/N&P project to design a passive recreation park and diversify natural habitats within the Manorhaven Nature Preserve. The project will achieve connectivity of the Manhasset Bay Trail from Port Washington North to Manohaven Beach Park via a pedestrian foot trail that meanders along North Sheets Creek. Improvements include design of a dog park, an ADA trail through the main portion of the park, a learning platform at the head of the creek, wildlife viewing blinds, seating areas, a pilot marsh restoration project, invasive species management, and creation of freshwater wetland, boulder and meadow habitats.
