PRIMARY WATERSHED AREAS AND WATER TABLE ELEVATIONS

Nelson, Pope & Voorhis prepared a Town wide Watershed Management strategy to be used for land management, watershed protection and public education for the Town of Southold. The development of the strategy included inventory and analysis of existing resources, agricultural lands, water recharge areas and land use. The inventory included the GIS mapping of the resources. The strategy included recommendations on zone changes, code revisions and creative land use techniques. The public outreach program coordinated by NP&V included community information and public participation meetings, television interviews and a Power Point presentation.
