NP&V has a variety of equipment used for many types of environmental sampling and monitoring, field testing and geophysical subsurface investigations.

Below is a list of the equipment/resources available through NP&V.

SOIL, GROUNDWATER & AIR SAMPLING

Truck Mounted Power Probe 9600
Track Mounted Power Probe 9100
Hand Augers with extensions, bucket & probe
Photo Ionization Detector (PID) (VOC's)
Horiba Groundwater Quality Monitor (for turbidity, pH, salinity)
Peristaltic Pump (for collecting groundwater samples)
Coring Drill
MiniRae VOC Monitor
Ponar Grab (for collecting dredge soil samples)
ISCO Sampler (for influent/effluent sampling of STPs)
Flatbed Trailer & 150 gallon water tank
Multi-Gas Meter
Decontamination Equipment

SUBSURFACE STRUCTURE DETECTION

Magnometer (metal detection)
Pipe Camera/Flushable pill
Ground Penetrating Radar (GPR) Unit

FIELD DATA COLLECTION

Global Positioning Systems (GPS) (for collecting data point locations)
Noise Meters
Range Finder (for calculating building heights for watershed analysis)
Two marine vessels (for depth soundings and water/dredge sampling, marine inspections, etc.)
